COPY OF PAPERS ORIGINALLY FILED

Sir:

With regard to the Office Action mailed 14 January 2002, a copy of which is enclosed, while the cover page correctly reflects the above referenced case the remainder of the document references United States Patent Application No. 09/404,295 (to Bettridge, et al). This second case is assigned to Examiner Jennifer McNeil in art unit 1724. Also, please take note that The Matthews Firm has requested to no longer represents Mr. Haase in the above matter. A copy of our Request for Withdrawal, filed 25 January 2002, is submitted as well.

Since no Office Action has been received for United States Application No. 09/918,246, there should be no time period running for response. While we have yet to receive confirmation of our request for withdrawal we respectfully request Examiner Hruskoci to forward to Mr. Haase a copy of the Office Action relating to the above referenced case as well as to The Matthews Firm.

Mr. Haase's mailing address is as follows:

Mr. Richard A. Haase P.O. Box 623 Sugar Land, Texas 77487 Jag- 5, 2002

Respectfully submitted,

Robert M. Bowick, Jr.

DETAILED ACTION

This action is in response to the amendment mailed December 20, 2001. A new examiner has been assigned.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 23, and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Grunke et al (US 5,006,419). Grunke et al teach a structural component made of a titanium alloy and covered by a protective coating. The protective coating comprises silicates and also includes high temperature resistant pigments such as chromium oxide. A specific example of the silicate that may be used is sodium silicate (water glass). The protective coating may be applied by spraying (col. 3, lines 59-66; col. 6, lines 58-67; col. 8, lines 26-29).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/404,295

Art Unit: 1775

Claims 2, 4, 5, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grunke et al (US 5,006,419) in view of Shalaby (US 5,118,581). Grunke et al teach a titanium alloy coated with a layer of silicate and chromium oxide as discussed above but does not give specific examples of the titanium alloys which may be protected. Shalaby teaches protection of gamma titanium aluminides with aluminosilicate coatings. The aluminosilicate coating is applied to the titanium alloy substrate and heated which forms a silicide intermediate layer. As it is shown by Shalaby that silicate coatings may be used to protect titanium aluminide alloy substrates, it would have been obvious to one of ordinary skill in the art at the time of the invention to apply the silicate coating of Grunke et al to the substrate of Shalaby to provide a protective coating which avoids discharge of dangerous compounds (Grunke et al, col. 3, lines 59-66). Regarding claim 2, the application of the silicate layer to the titanium alloy substrate and the subsequent heat treatment would form a silicide layer therebetween.

Allowable Subject Matter

Claims 17-22 are allowed.

Response to Atguments

Applicant's arguments with respect to claims 1, 2, 4, 5, 7, 23, and 24 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1775

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer McNeil whose telephone number is 703-305-0553. The examiner can normally be reached on Monday through Friday, 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones can be reached on 703-308-3822. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.

SUPERVISORY PATENT EXAMINER

Attachment for PTO-948 (Rev. 03/01, or earlier) 6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.8\$

New corrected drawings must be filed with the changes incorporated therein Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1 136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a)

Failure to take corrective action within the set period will result in ABANDONMENT of the application.
